

ENTERTAINMENT HANDSET

Easy-to-use patient Entertainment Handset is designed to meet the specific requirements of patients and staff. Providing significant improvements over the existing handsets with durability and improved features. Including a speaker for listening to TV/radio and a convenient group of controls for reading light, TV channel and volume selection. The Nurse Call button has Braille identification and two reassurance lights.

Features:

- Raised colourful buttons for nurse call, patient entertainment, and over bed light
- Large, easily identified nurse call push button with Braille and two colourful reassurance lights
- Ergonomic feel, no sharp edges
- Minimal ingress potential
- High-impact plastic case and rubber bumper
- A smooth moulded case designed for single handed operation
- Durable moulded plug-in cord
- Liquid resistant Mylar speaker for superior voice intelligibility
- Audio frequency specifically designed for an ageing ear
- An earphone jack and a microphone for patient communication via portable phones

Infection Control:

The Lexan material contains built-in, organic antimicrobial protection against serious bacteria. The antimicrobial material achieves a 99% biocidal kill rate for a wide range of bacteria including;

- Methicillin-resistant Staphylococcus aureus (MRSA)
- Salmonella enteritidis
- Escherichia coli (E. coli)
- Listeria monocytogenes

The plastic is impregnated with broad spectrum technologies, reducing cross infection against following microorganisms;

- 13 Bacterial
- 14 Fungal
- 2 Steplomyctes
- 3 Yeast
- 2 Algae
