

MAVIS (MASTER AUDIO VISUAL INTERFACE SYSTEM)

The MAVIS generates customised tones and alerts for nurse call and other alarm events. The device allows the connection of multiple speakers to enable the tones to be heard in multiple locations in the facility. The tones correspond to the alert priority of the call.

Features:

- 6 different tones available
- Rack mountable 1RU enclosure for simple installation
- Master volume control
- Individual volume control for every tone
- Tones will be created from WAV file data stored into the FLASH memory onboard the processor
- Tones can be imported and customised
- The audio Interface Module will be connected via a simple RS485 connection into the CarePlus infrastructure
- Crisp clear tones for alarm events
- 70 Volt audio output line
